Technological potential

The bunches are medium-sized and moderately compact to compact. The berries are also medium-sized with a thick skin.

Bouquet 3176 produces wines with good aging potential that are verycolored, rich in polyphenols, tannic, and astringent, with aromas of spices and black fruits.

Susceptibility to Diseases and Pests

Bouquet 3176 is tolerant to downy mildew and resistant to powdery mildew. Minimal fungicide protection is essential in all cases.
It is however susceptible to black rot and very susceptible to bud mite disease. This variety can also be a little sensitive to grey rot.
