Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allele 1	137	223	243	176	194	256	227	239	238
Allele 2	147	229	247	188	204	260	243	251	245

Cultivation and agronomic skills

Bouquet 3196 has a horizontal to drooping bearing. This very vigorous variety grows long shoots. It is not very fertile on the basal buds and should therefore be pruned long. Bouquet 3196 is well adapted to warm climates and Mediterranean conditions, but may be susceptible to coulure.

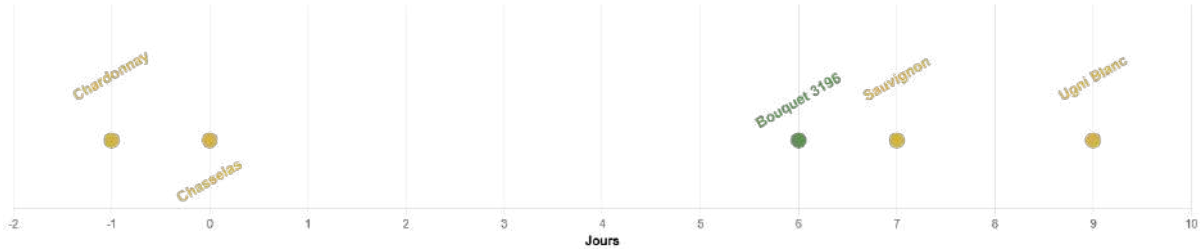

Clonal selection in France

The only certified Bouquet 3196 clone carries the number 1422.

Phenology

Bud burst: 6 days after Chasselas.
Grape maturity: mid-season, 2 weeks to 2 weeks and a half after Chasselas.

Debourrement

Technological potential

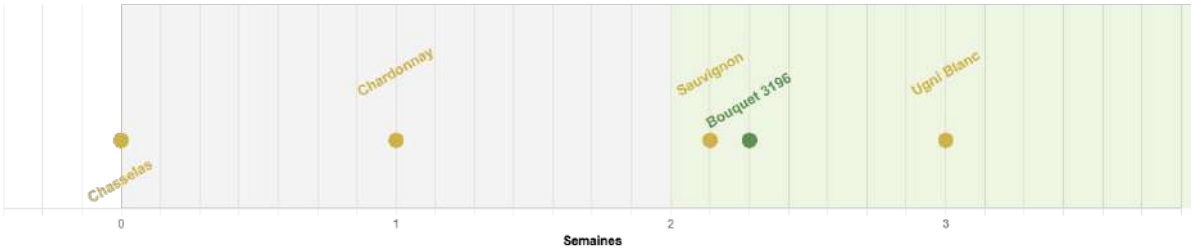

The bunches are medium to large, loose, and ramified. The berries are also medium to large, with a medium to thick skin and a muscat flavor.

This variety has low sugar accumulation potential and high acidity. Bouquet 3196 is used to produce light, aromatic white wines with notes of exotic fruits and citruses.

Susceptibility to Diseases and Pests

Bouquet 3196 is tolerant to downy mildew and resistant to powdery mildew. It is however susceptible to black rot.
According to the breeder, based on current knowledge, two fungicide treatments for downy mildew and powdery mildew are essential to preserve resistance factors. This protection should be increased in case of high disease pressure.
